ABOUT THE EVENT

You may know the basics of Agile. You may have run a pilot project or even have a complement of Agile teams already embedded. But the principles and methodologies are only half the story. How do you actually apply the theory, turn ideas into action and deliver real-world, practical value to your organisation?

Take the next step in your Agile journey and become an Agile Alchemist - transforming base metals into gold! Learn how to unlock the potential and power of Agile across your organisation - at the project, program, portfolio and enterprise level. Then light the spark for complete Business Agility.

This interactive, advanced course, will enable you to take Agile to the next level in your team and across your organisation. Mark out your whole Agile roadmap, from initiation to delivery and beyond. Explore practical strategies to scale up (SAFe, LeSS), how to manage multiple teams in an Agile framework and successfully interact with adjacent teams and organisational areas.

TRAINING DELIVERY AND PRE-COURSE QUESTIONNAIRE

This workshop will be delivered using a three tiered approach. The structure of each session is as follows:

1. Technical overview and review of research into the topic area under discussion
2. Practical application of management principles in the review of case studies, worked examples and interactive exercises
3. Discussion of outcomes and implementation issues

Workshop participants will have the opportunity to include comments and questions about issues outlined in the program by way of a pre-course questionnaire. This feedback will enable the course facilitator to adjust content accordingly. The workshop has limited places to allow for customisation, greater interactivity and for individual concerns to be addressed.
