ABOUT THE EVENT

Information technology is a vital underpinning for an organisation's success. However, with the convergence of business, consumer and communication technology, IT is now integral to core business operations. ICT staff must be technically proficient and business savvy. They must be capable of solving complex business-systems and client-facing problems efficiently. Even the most accomplished ICT professionals will find that technical skills alone do not assure effective leadership or strategic thinking. To be a leader and add strategic value to the organisation, ICT professionals need to complement their occupational expertise with breakthrough leadership and coherent strategic business planning skills.

Leading high-performance ICT teams to maintain organisational functionality and add strategic value to the company is no easy feat. It requires an ability to convey complex information to non-ICT executives, colleagues and clients. An ICT leader must inculcate an understanding of their contribution to business strategy. They must develop a workplace culture conducive to innovation but focussed on results.

This two-day workshop will delve into strategies for driving performance. You'll learn how to modify your communication style, engage staff and stakeholders while adding strategic value through enhanced ICT leadership.

DAY ONE

Attributes of executive-level technology leaders

- The psychology of leadership
- Emotional Intelligence (EQ), the art of knowing yourself and others
- Adapt and understand individuality and the advantages

Develop cohesive and high performing teams

- Recognise the value of your team
- Utilise their skills to drive performance
- Understand the dysfunctions of a team

Self-mastery and balance

- Overcome demotivation, stress and frustration
- Better you, better team
- ► The significance of balance

How to have and accept the hard conversations

- Understand the significance of feedback
- Measure performance the good, the bad and the ugly
- Deliver constructive criticism

TRAINING DELIVERY AND PRE-COURSE QUESTIONNAIRE

This workshop will be delivered using a three tiered approach. The structure of each session is as follows:

- 1. Technical overview and review of research into the topic area under discussion
- 2. Practical application of management principles in the review of case studies, worked examples and interactive exercises
- 3. Discussion of outcomes and implementation issues

Workshop participants will have the opportunity to include comments and questions about issues outlined in the program by way of a pre-course questionnaire. This feedback will enable the course facilitator to adjust content accordingly. The workshop has limited places to allow for customisation, greater interactivity and for individual concerns to be addressed.

DAY TWO

The business of leading organisational change and projects

- ► Challenges leaders face in ICT & Digital
- Navigate challenging business scenarios
- Mentoring, coaching and professional development

Manage change through times of transformation

- Define change and its attributes
- ► Foster innovation in times of trouble
- Establish trust within your team

Career planning - A story of yours and mine

- ► Recognise where you want to be
- Review and reflect on the past
- Create the stepping stones to your goal

The future of ICT and Digital

- ► What's next in the ICT & Digital sphere?
- Revisit key themes and lesson
- ► Create a realistic action plan

WHO WILL ATTEND?
