ABOUT THE EVENT

In this thriving but competitive space, leaders must be both technically proficient and business savvy. They need to be capable of solving complex business and client-facing problems quickly and efficiently. Even the most technically accomplished professionals recognise that technology and business skills alone will not assure either effective leadership or strategic thinking. Learning to be self-aware and articulate your vision in a way that engages the right people at the right time are invaluable skills that will develop and enhance your authentic leadership voice. To be a leader and add strategic value to your organisation, you need to complement your occupational expertise with breakthrough leadership and effective and empowered team leadership.

This practical, hands-on two-day workshop will examine the many moving parts and the key ingredients of a high-performing leader in this dynamic environment. You will be equipped with the practical skills to communicate authentically, master emotional agility, lead motivated and empowered teams and move your team from conflict collaboration - creating a personal action plan to unleash your leadership potential and take the next step in your career.

You will also have front-row seats for an exclusive discussion session, where established industry C-suite leaders will share their personal stories and pathways to success.

3. Discussion of outcomes and implementation issues

Workshop participants will have the opportunity to include comments and questions about issues outlined in the program by way of a pre-course questionnaire.
